

Monther Ibrahim

Junior Software Engineer

+972 50-301-9542 | mndr6702@gmail.com | Portfolio | GitHub | LinkedIn

PROFILE

Junior Software Engineer graduating July 2026, focused on full-stack development and integrating AI APIs into web apps. Strong in React, PostgreSQL/Supabase, and Spring Boot through internship, freelance client work, and shipped live deployments.

EDUCATION

B.Sc. in Software Engineering

Kinneret College
Oct 2022 – July 2026

Coursework: Intro to CS (100), OS (95), Systems Programming (92), SIS (90), OOP (90), Networks (84)

TECHNICAL SKILLS

Languages: Java, C, JavaScript, TypeScript, Dart

Frontend: React, Next.js, Angular, Vite, Tailwind, Framer Motion

Backend & Mobile: Node, Express, Spring Boot, Flutter, Firebase Functions

Data & Cloud: PostgreSQL, Supabase, Firebase, MySQL

Tools: Git, Figma, Vercel, Firebase Hosting

PROFESSIONAL EXPERIENCE

Software Engineer

Apr 2026 – Present

OLGE Foundation — Remote

- Build and maintain web applications using **Next.js**, **React**, and **Supabase** (PostgreSQL), deployed and maintained on **Vercel**
- Implement features and fixes from tickets; participate in code reviews, planning, and QA
- Write tested, documented code and address feedback before release
- Collaborate with the team on technical planning and timely delivery of features

Freelance Developer

June 2025 – Present

Self-Employed — Remote

- **AJ Motors:** Built a full-stack car rental platform with **React 19**, **Vite**, **Tailwind CSS**, and **Firebase** (Firestore, Auth, Cloud Functions, Storage, Hosting). Features include admin dashboard with analytics, multi-language support via DeepL API, and WhatsApp booking integration — **Live**
- **Baby Fashion Store:** Developed a custom e-commerce platform using **React**, **Vite**, and **Firebase** with full cart/checkout flow, order management, inventory tracking, and Framer Motion animations. Stripe-ready payment architecture — **Live**
- **Volt App:** Currently building a cross-platform mobile shop for electric components using **Flutter** and **Dart**. Implements **Riverpod** state management, **go_router** navigation, Google Sign-In, and geolocation services (*In Progress*)

Software Developer Intern

Feb 2025 – June 2025

Ceeras IT Services — Remote

- Built backend services using **Java Spring Boot** with JPA for database integration and entity management
- Built and consumed REST APIs between backend services and client applications
- Worked with a remote team on integration, testing, and on-time feature delivery

PROJECTS

AI Budget App — Angular + Express + PostgreSQL, DeepSeek AI insights, secure auth.

WebChat — React 18/Firebase real-time chat with commands, reactions, mobile UI.

Java Logic Games — Chess and Minesweeper in JavaFX (OOP, MVC).
